Pre-compressed Expanding Foam Tape - Applications

General Information

Our range of expanding foam sealing tapes are based on a diffusion-open material, which renders high resistance to wind and weather as well as UV-light, and simultaneously reduces the risk of rot and fungal attacks on adjacent building materials. Furthermore, our sealing tape is a high-quality product, which to a vast extent benefits the environment, both in production and application.

Applications

Sealing of gaps between window/door frame and brickwork.
Sealing between concrete sections.
Sealing between sill and embrasure.
Sealing of double casement windows.
Sealing of sky-lights and roof-lights.
Sealing of roof construction.
Insulation against noise and vibration in connection with ventilation and climate installation.
Insulation against noise and vibration within the caravan and park home industry.
Insulation in connection with window installation.
