

UK REACH Compliance Statement

Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) last reviewed on **13th September 2021**.

The EU REACH Regulation has been brought into UK law under the European Union (Withdrawal) Act 2018. REACH, and related legislation, has been replicated in the UK with the necessary changes to make it operable in a domestic context. The key principles of the EU REACH Regulation have been retained. This regime is now in operation and is known as UK REACH. RH Nuttall recognises its responsibility to identify and manage the risks present by substances we manufacture and market. The aim of REACH and this risk identification is to provide a high level of protection of human health and the environment from the use of chemicals.

Customers must query unlisted material with a company senior member, typically Quality Manager.

Chemical substances contained in our products, which may possibly be subject to registration, have to be registered exclusively by our suppliers.

I recommend customers to refer to safety data sheets prior to use and contact RH Nuttall for any assistance.

Thank you
